

Chief Mission Operations

Req ID: SB_CM_01 to SB_CM_03

Position Title: Chief Mission Operations

Classification Requirement: TS/SCI with CI polygraph

Position Description:

The Chief Mission Operations Candidate will be part of the greater Systems Engineering Integration and Test team at SAGE Black. Performs technical planning, system integration, verification and validation, cost and risk, and supportability and effectiveness analyses for total systems. Analyses are performed at all levels of total system product to include: concept, design, fabrication, test, installation, operation, maintenance and disposal. Ensures the logical and systematic conversion of customer or product requirements into total systems solutions that acknowledge technical, schedule, and cost constraints. Performs functional analysis, timeline analysis, detail trade studies, requirements allocation and interface definition studies to translate customer requirements into hardware and software specifications. Generate CONOP for new capabilities. Coordinate with product owners and SE/CMO team and users to determine best implementation approach to meet the mission goals. Coordinate with users to determine root cause of operational issues and support development and test team in resolving those issues. Provide operational readiness checkout of the new baseline prior to delivery. This role is a user advocate and is able to express user needs and issues to the program. Perform site transition, to train the user on the system, transition new users to the system and then provide sustained support to those users as they become familiar with the baseline. Perform remote training sessions to inform users of new capabilities and give refresher training remotely.

Because we serve on a greater team that serves our country, the Chief Mission Operations candidate is required to possess an active Top Secret/Sensitive Compartmented Information (TS/SCI) security clearance and successfully complete a counterintelligence (CI) Polygraph.

Required Skills:

- Current Active TS/SCI
- Experience with Image Exploitation, GEOINT, Reporting and Dissemination, Geospatial domain areas
- Experience providing user training
- Experience working through user reported issues and resolving
- Experience presenting new system capabilities to users
- CONOPs Development

- Feature and User Story Design and Definition
- Training Material Development
- System Operational Readiness Review
- Willingness to Travel frequently to meet with users

In addition to the above skills, the successful candidate will possess some subset of the following:

- VersionOne
- DOORs
- Ozone Widget Framework, Application Development Understanding
- FVEY
- Excellent communications, organization and planning skills, with ability to work independently
- Experience presenting at technical reviews with customers and users
- Microsoft Office (Powerpoint, Word, Excel, Visio)
