

## Database Analyst / Programmer

**Req ID:** SB\_DBA\_02 – SB\_DBA\_05

**Position Title:** Database Analyst and Programmer

**Clearance Requirement:** DoD Top Secret. US citizens only.

### **Position Description:**

SAGE Black is seeking a Database Analyst/Programmer to support our government intel customer in Littleton, Colorado. We are looking for self-starters who can quickly come up to speed on complex systems. You must be a team player capable of communicating and working with peers, managers, and customers. The successful candidate will thrive in a dynamic and challenging work environment.

Responsible for data design, database architecture, metadata and repository creation. Provides technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on data-based solutions to analysis problems, data architectures, data base management system facilities and capabilities, and the operation and tuning of databases. Coordinates the data administration technical function for data warehouse and business intelligence development and maintenance. Monitors databases to ensure accurate and appropriate use of data and is responsible for quality control of the database activities. Plans the technical transitions between development, testing, and production phases of the product. Performs data architecture design and construction. Codes and documents scripts and stored procedures. Develops appropriate programs and systems documentation. Assists with metadata repository management. Prepares and implements data verification and testing methods for the data warehouse. May be assigned responsibility for the management of the function, including associated staff.

Because we serve on a greater team that serves our country, the Integration and Test Engineer is required to possess an active Top Secret/Sensitive Compartmented Information (TS/SCI) security clearance and successfully complete a counterintelligence (CI) Polygraph.

### **Required Skills:**

- Bachelor's in a related field with 2+ years of experience *or* 6+ years of industry experience
- Experience in multiple databases to include Oracle
- 4+ years of Linux experience

**In addition to the above skills, the successful candidate will possess some subset of the following: \***

- Familiarity with HADOOP- HDFS, Hive, MapReduce considered a plus
- Experience with Java, Javascript,
- Experience in an agile development environment

**SAGE black is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, pregnancy, sexual orientation, gender identity, national origin, age, protected veteran status or disability status.**
