

# Imagery Analyst

**Req ID:** SB\_IMGA\_01 – SB\_IMGA-03

**Position Title:** Imagery Analyst

**Classification Requirement:** TS/SCI with CI polygraph

## Position Description:

Imagery Analysts play an integral part in providing information to our customers. Imagery Analysts use overhead and aerial imagery, geospatial data, full motion video, and other electronic monitoring to collect and analyze information. Imagery Analysts are primarily responsible for supervising and analyzing overhead and aerial imagery developed by photographic and electronic means. Duties performed by Imagery Analysts include using principles and techniques of photogrammetry and employing electronic, mechanical, and optical devices to obtain information from imagery. Obtains intelligence by studying and analyzing imagery products. Determines target coordinates for accurate location of imagery analysis findings. Identifies adversary weapons, equipment and defenses and determines Order of Battle. Analyzes adversary installations and lines of communications. Conducts Battle Damage Assessment analysis. Prepares imagery analysis reports and products. Analyzes current intelligence holdings to identify gaps, and subsequent intelligence collection requirements. Considers adversary Order of Battle records in the development of collection tasks and assessment of enemy vulnerabilities and probable courses of action. Assists in the preparation of reports on captured adversary material. Drafts periodic and special intelligence reports, plans, and briefings.

Because we serve on a greater team that serves our country, the Imagery Analyst is required to possess an active Top Secret/Sensitive Compartmented Information (TS/SCI) security clearance and successfully complete a counterintelligence (CI) Polygraph.
